SUMMARY

Computer Information Systems student with strong frontend skills in React, JavaScript, and Tailwind CSS, plus intermediate knowledge of C# and ASP.NET Core, seeking a .NET Full Stack internship opportunity.

EDUCATION

Bachelor's in computer information systems

University of Jordan • Amman • 2026 • 3.39

CERTIFICATIONS

React.js Development Course

2026

• Relevant because it provided practical skills in React.js for building dynamic, component-based, and responsive web applications.

Frontend Web Development with HTML, CSS, and JavaScript

2025

• This certificate is relevant because it provided me with foundational frontend development skills in HTML, CSS, and JavaScript, including building responsive layouts, styling user interfaces, and adding interactivity to web applications

ASP .NET (MVC and Core

2024

• This certificate is relevant because it provided me with foundational and practical skills in ASP.NET MVC and ASP.NET Core, which are essential for .NET full stack web development.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Web Design

Backend: C#, ASP.NET Core, REST APIs, Object-Oriented Programming (OOP), Entity Framework Core

Tools: Git, GitHub, Visual Studio, VS Code

Other: Redux, JSON ,Problem Solving

PROJECT

Personal Portfolio Website

Independent Project • alimohammed04.github.io/Personal-Portfolio-Website/ • February 2026 – March 2026

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, and contact information in a clear and professional format.
- Built multiple structured sections including About, Skills, Projects, and Contact to improve content organization and user navigation.
- Applied responsive web design principles to ensure consistent performance and usability across desktop, tablet, and mobile devices.
- Developed dynamic interactive features utilizing JavaScript to optimize user engagement and interface responsiveness.

To-Do List Application

Independent Project • todo-liisstt.netlify.app/ • March 2026 – March 2026

- Built a task management application using React and Material UI with 4 core features: adding, editing, deleting, and completing tasks.
- Implemented local storage integration to preserve task data across browser sessions and improve user convenience.
- Developed a responsive interface with Material UI components to provide a clean and consistent experience across desktop and mobile devices.

Currency Converter

Independent Project • alimohammed04.github.io/Currency-Converter/ • May 2025 – May 2025

- Users to convert values across multiple currency options through a clean and intuitive interface.
- Implemented core conversion logic with dynamic input handling, ensuring accurate calculations and fast result display based on user-selected currencies.
- Added input validation and error handling to prevent invalid entries and improve reliability during user interactions.
- Designed and structured the application with organized JavaScript logic and maintainable styling for better readability and future scalability.
